Valtice castle and wine cellar

The Valtice castle, which came into existence thanks to an enlargement of a tower house that was probably founded in the 11th century, was the seat of the ruling prince of the Liechtenstein family from the end of the 14th century, until the post-war confiscation. The magnitude and splendour of Baroque decoration proves, even today, that it was the residence of one of the most powerful noblemen in the Danube monarchy. The castle acquired its present appearance as a result of costly reconstructions in the 17th and 18th centuries. Since the expropriation in 1945, it has been in the possession of the Czech state and is administered by the National Heritage Institute. In 1996, the castle, as an integral part of the Lednice-Valtice Area, was listed by UNESCO as a World Cultural and Natural Heritage Site.

The unique Castle cellar from 1430 is one of the oldest and largest wine cellars in the Czech Republic. For centuries, the best wines from the oldest winery of the Lednice-Valtice Area - CHÂTEAU VALTICE - Wine Cellars of Valtice, a. s. have been maturing here in huge oak barrels.

Classical music concert

During the evening, the students of the KEA Olomouc will perform compositions of classical music by world-famous composers such as Bedřich Smetana, Antonín Dvořák, Leoš Janáček (Czech) and Henryk Wieniawski (Poland).
